

Showing a projection map of the stars from Astronomy Magazine, March 2013 (month that the Mars riddles solved/discovered)

Showing the mathematical alignments of the Holy Cross and Crescents with Orion.
Also showing the "ecliptic", the path of the Sun, Moon, and Planets.

Seeing the ecliptic pass over Orion's outstretched arms looks like a moving star-glyph. Then see how Taurus the Bull looks like a pair of outstretched arms, and it touches the Auriga constellation which looks like a hoop (and a stadium). Then take into account that basketball's dynasty team is the Bulls, Chicago.

EBULA WITH SURROUNDING B

-Note that path passes through the middle of the constellations shaped like people.
-Note that path passes through a constellation shaped like a hoop, and also by another constellation shaped like a hoop, which is located with the Orion and Gemini shapes.
Seeing all the evidence of GOD manipulating the Earth, Mars (others), and the Cosmos and galaxies, to tell a story, why would HE not tell a story with the path and movements of the sun, moon?
